### MTS Cloud

Tbilisi, [cloud.mts.ru/en/](https://cloud.mts.ru/en/)

IT, System Integration, Internet

- Internet Service Provider

### System engineer

Responsibilities:

Deployment, maintenance, monitoring, scaling, tasks automation and configuration of the Linux + WS based infrastructure. Technical documentation writing, working closely with colleagues from other teams, reaching out vendor support in English, 24/7 shifts.

Tools:

Configuration is done using bash scripting and Ansible automation, to monitor our servers we use Zabbix. Servers are virtualized through VMware software, network is set based on VMware EDGE\ NSX technologies. The data database our product is linked to is MS SQL server. Backups are done through various Veeam backup applications.

Personal experience:

LINUX - RHEL, CentOS

ANSIBLE - playbooks, roles, J2 templates

DOCKER - Docker file, Docker compose file, CLI

KUBERNETES - set up of: Deployments, Services, Ingress, Helm charts.

JENKINS - build\test\deploy style pipeline jobs, integration with GitHub and Docker. Writing Jenkins file.

BASH\PYTHON - scripts.

GIT\GITHUB - all fundamental operations.

AWS - understanding of the following services:

EC2 (AMI,EBS,EFS,ELB,ASG,Security grup), ECS, Elastic Beanstalk, IAM, Route53, S3, SQS, SNS, VPC, WAF

MS SQL SERVER \ POSTGRES - Deployment, configuration, CLI \ PGAdmin.  
NGINX - deployment, configuration.

July 2018 — March  
2021

## Further information

## About me

I like meeting new people and spending time together, whether it's free time or working on some task with colleagues. I'm a calm , easy-going person who likes helping others and making friends. I'm always looking for something new and challenging, these days I'm spending hours every day learning new and I'm extremely motivated to push further at IT and in all other aspects of my life.
